Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, 18, 19, 26, 29-46, 51, 52, 54, 59, and 60, drawn to a method and system for storing, viewing or downloading an information from the network when the wireless device is out of range of communication with the transceiver, classified in class 455, subclass 421.
 - II. Claims 17, 20-25, 27, 28, 47-50, 53, 55-58, and 61, drawn to a method and system for updating golf score leader-board, classified in class 700, subclass 92.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in a system lacking the method for updating golf score leader-board. See MPEP § 806.05(d).
3. These inventions are distinct for the reasons given above, and the search required for each Group is different and not co-extensive for examination purpose. For example, the searches for the two inventions would not be co-extensive because these groups would require different searches on PTO's classification class and subclass as

following:

(a) the Group I search (claims 1-16, 18, 19, 26, 29-46, 51, 52, 54, 59, and 60)

would require use of search **Class 455, subclass 421** (not require for the invention II).

(b) the Group II search (claims 17, 20-25, 27, 28, 47-50, 53, 55-58, and 61)

would not require use of search **Class 700, subclass 92** (not require for the invention I).
